

FIT Show press release  
February 2019  
Final

## **Hörmann UK to showcase new internal doors at FIT Show 2019**

Hörmann UK, Europe's leading door manufacturer, will be launching its new internal timber door offering to fabricators and installers from the 21<sup>st</sup> - 23<sup>rd</sup> May at the NEC, Birmingham, whilst also showcasing its high quality steel and aluminium entrance doors.

Having firmly established itself as the number one provider of entrance doors, garage doors and timber internal doors, Hörmann UK prides itself on offering the highest standards in products and services via its nationwide network of distributors.

On stand D26, visitors will have the opportunity to meet with Hörmann UK's dedicated team of experts to find out more about its new range of timber internal doors, which feature uncompromising quality to deliver a long service life that meets the daily needs of modern families.

Designed to suit both contemporary and traditional properties, the doors feature a range of designs including frameless glass, stylish Grey Oak or Anthracite options for modern interiors, with Spanish Oak and Parchment White finishes for more classic homes.

Also on show will be Hörmann UK's innovative Thermo65 and Thermo46 entrance doors, which offer world class U-values as low as 0.87W/m<sup>2</sup>.K. The doors are constructed of high-quality components including a 46mm or 65mm thick steel door leaf, which features a composite sub-frame for high stability, combined with an aluminium frame that incorporates a thermal break, contributing to excellent thermal insulation.

Featuring a large selection of styles at an attractive price-performance ratio, the Thermo46 and Thermo65 entrance doors are an industry favourite, offering a uniform view from the inside due to the solid door leaf construction.

Also on show is Hörmann's popular ThermoSafe entrance door, available in over 70 different styles and 18 colours, which offers impressive energy efficiencies. This is combined with first class security benefits due to its standard security equipment, certified to EN1627 resistance class 3, including a 5-point security lock.

Celebrating its 40<sup>th</sup> anniversary throughout 2019, Hörmann UK has developed a strong relationship with its nationwide network of distributors, homeowners, architects, specifiers

and construction professionals over the last four decades, which is reflected in the company's diverse and ever expanding product and service offering.

David O'Mara, Marketing Manager for Hörmann UK, said: "Here at Hörmann UK we are dedicated to providing professionals with products that are not only easy to install, but are also readily available, which is why we work closely with our nationwide network of distributors to ensure we offer the shortest lead times possible.

"The FIT Show is the ideal opportunity for us to showcase all that Hörmann UK has to offer, including our innovative new timber internal doors. We're looking forward to receiving feedback on the latest product range and welcome all professionals on stand for an exclusive look."
