Stand no. B6

Hörmann UK to showcase garage doors at FIT show

For the first time, Hörmann UK will be displaying its market leading range of garage doors on its stand at the FIT show, together with premium entrance doors, and Smart technology. A wide portfolio of products which provide exciting opportunities for fabricators and installers.

Taking centre stage will be the new RollMatic T roller door which has been designed to be fitter friendly and of exceptional quality. RollMatic T has been developed to address the requirements of an increasingly competitive UK roller door market, whilst maintaining the high standards expected from Europe's leading garage door manufacturer. Specifically designed to be quick and easy to fit, the door is supplied in two sturdy and easily transportable boxes containing all the components needed to install and operate the door, with pre-assembled and pre-drilled components reducing preparation time on site.

Demonstrations illustrating just how quick and easy the RollMatic T door is to install will take place on the Hörmann stand throughout the show.

Hörmann automated sectional garage doors, which are supplied with Secured by Design as standard, will feature a number of the new and exciting colours and finishes available. On show will be the new Slategrain finish, which replicates the natural finish and structures of slate, and the innovative and creative 'Duragrain Individual Print' which offers the ability to print individual images onto the surface of the garage door.

Also on show will be Hörmann's innovative range of Thermo65 steel and aluminium entrance doors offering good looks and exceptional security, alongside impressive U-values as low as 0.87W/m²k. Manufactured from high grade components together with a 65mm thick door leaf, the range features an extensive range of styles, accessories, and finishes.

Featured for the first time will be the Thermo 65 black.edition, a range of accessories in elegant Jet black, mirroring the latest trend for black interior fittings popular in both kitchens and bathrooms.

Visitors to the stand will also be able to see the most advanced automation systems which feature Bluetooth technology enabling opening and closing of both garage and entrance doors using a mobile phone or tablet. This is in addition to the conventional operation by way of remote control using handheld transmitters.

In response to the increasing popularity of Smart home devices now available, covering everything from heating, security, and home comfort, Hörmann will be featuring their Homee which brings the garage and home closer. The Homee provides full home automation by connecting to other smart home systems via an app so that they can all work from one central platform.

Wolfgang Gorner, MD of Hörmann UK comments, "The FIT show provides Hörmann with the ideal opportunity to showcase our garage doors to a new market sector. We know that more fabricators and installers are looking to expand into the 'home improvements' market and Hörmann garage doors are the ideal fit. Not only do we offer an extensive and high-quality range of garage doors, but the introduction of our RollMatic T also offers the quickest and easiest door to fit on the market – truly fitter friendly.

Steel entrance doors and our Smart technology complete what is an exciting and innovative range of products - the team and I are looking forward to welcoming existing and prospective customers onto the stand."
