General Release  
March 2021  
Final

### **Hörmann UK Launches Mobile Road Blocker**

Hörmann UK will launch their new Road Blocker 1000 SF in June of this year, a vehicle blocking system involving no foundation works whilst being able to withstand impacts of a 7.5 tonne vehicle at speeds of up to 50 km/h.

Designed and developed to provide simple and fast fitting onto existing concrete finished floor surfaces without the need for costly groundwork, the 1000 SF offers a high visibility deterrent and high levels of security against unauthorised vehicle access or attack. It is suitable for either permanent or temporary installation, with only the provision of a suitable power supply being required.

With a barrier height of 1000mm, the 1000 SF Road Blocker is available in widths of 3.5m, 4.5m and 5.5m. Optionally fitted with an EFO (emergency fast operation) function, the 1000 SF is suitable for frequent use and capable of managing 2,000 cycles per day.

High levels of protection are in-built with the Road Blocker being compliant with PAS 68 / IWA14-1 / ASTM.

Cost effective and simple to install, the Hörmann 1000 SF Road Blocker is suitable for a wide range of applications, providing access control and security for pedestrian shopping areas, car parks, open air events, and commercial and public buildings. It joins a growing family of innovative perimeter protection system from Hörmann UK, all offering reliable, high quality security solutions.
